

Our current projects:

includem+

Multiple Risk Service

As part of NHS Greater Glasgow & Clyde Youth Health Service, includem have been delivering Multiple Risk support in nine GP surgeries and venues across Glasgow since July 2021.

Our Multiple Risk Workers address risky behaviours, supporting young people to make changes, build resilience and find a positive path.

This is already helping those engaged in risky behaviours such as relationships, virtual spaces, gambling, antisocial behaviour or alcohol and drug use.

Appointments are available for young people aged 12-19 years who live in Glasgow or are registered with a Glasgow GP.
