SPOT Purchases

We understand that even where there is a level of support for a family, situations can arise that require additional support or a more intensive approach.

Includem can provide a flexible and responsive intervention via a 'spot purchase' arrangement that will meet the needs of the children, young person or family but also the referrer. This support is needs led and can be reviewed regularly to ensure the right level of support is reaching the right families at the right time.

Contact [David Ferrier](#) to find out more!
