Early Intervention

We have extensive expertise in supporting children and young people in crisis and are best placed to provide effective early individual and whole family support identifying and addressing underlying reasons for risk taking behaviours, poverty, and trauma which may lead to more problematic circumstances. Working holistically alongside children, young people, their families, and others within their lives we provide a bridge between home, school, and community to ensure the right support is provided by the right people at the right time.

Young people and families helped shape our early intervention services and tell us they are essential to providing support and addressing needs and risks before they escalate. It is essential that we increase our early intervention supports to reduce risk of offending, drug/alcohol misuse, homelessness, neglect, abuse, and harm to physical and mental health.
