## Youth Justice

Our youth justice services allow for a credible alternative to young people progressing through the justice system by giving confidence in the success of prevention, early intervention, and diversion from prosecution.

We work to address the underlying causes of crime, reduce the frequency and severity of antisocial and criminal behaviour, and support rehabilitation alongside working to reduce re-offending and revictimization. We advocate for and support the voice of children, young people and families in the court system and our approach is to justice empower everyone.
