

Project Connect

An update from Kerry Ann

At the end of 2022, workshops took place between with the software developers to explore the HR and Learning & Developments of the current MAPS. Following these workshops there have been a few improvements made which we are calling "Quick Wins" which affect the look and feel of MAPS. You will see some of these new changes from the 6th February 2023.

Further workshops will take place around mid February where we will look at the service delivery element of MAPS and how this can be improved in line with our processes to ensure the software is being utilised appropriately.

See below for an overview of the 'Quick Wins' that you'll see updated in MAPS from 6th February which includes allowing you to find and see more relevant information directly.

Branding

- Overall branding update - Banner and logos will be updated in line with our new branding
- Task Icons have been updated in line with current branding
