

# Project Connect

An update from Kerry Ann

## SharePoint Migration

The migration to SharePoint is all but done with the exception of files and folders which sit on the i: drive and this should be complete this week.

There are only a few staff laptops remaining to be Azure joined but.....

We are officially a cloud-based Organisation! Which, in a nutshell, means.....

- Security ☒
- Flexibility ☒
- Mobility ☒

Thank you all for your patience during this part of Project Connect. It's really appreciated ☺

Remember that no files or folders should be accessed or saved from Teams or the drives and everything should be accessed through your Microsoft log in via SharePoint.

If there are any files and folders that you can't find or don't have access to, please contact the IT Team (ITSupport@includem.co.uk)

[Watch our SharePoint explainer video here.](#)

## MAPS Review

We now have some dates in the diary with the Digital Champions and Rockpool, MAPS Software Developers, where we will gather around the table for a scoping session and look at how we use MAPS and what we can do to improve the software in line with our current processes.

This will form the beginning of the MAPS review and help to look at what additional workshops and sessions may be required going forward.

Look out for an update on how the session went in the Newsletter in 2 weeks.
